DESCRIBE THE PRESENT AND ORIGINAL (IF KNOWN) PHYSICAL APPEARANCE

The Bernice Rodeheaver Farm is located on the SW side of Squire Fike Road. The facade of the house, facing the road, points northeast. A large frame bank barn faces the house on the northeast side of the road.

The farmhouse is a two-story, frame, ell-plan dwelling with a three-bay, center-door facade. A one-story shed addition fills in the ell on the NW elevation, and a porch runs the length of the facade and wraps around the E corner to run the length of the SE side.

The house is covered in brown asphalt siding except for the attic story of the northwest gable end, which is covered in fishscale shingles. The windows on the second floor facade and several others retain their 2/2 sash. Others have been replaced with 1/1 sash. The second floor facade windows also exhibit pedimented window heads, while other windows have flat window heads. All windows have plain board surrounds. The roof is of grey diamond-shaped asphalt shingles.

The house has three flues: One interior flue at the center of the main block, one exterior flue at the northwest gable end, and one interior flue on the SW elevation.

The porch has a rubble foundation and a cement floor. The porch roof is a shed supported by plain wooden porch posts and is covered with green asphalt sheathing.

## STATEMENT OF SIGNIFICANCE

This house is an example of a common western Maryland type. Houses of this general configuration, a rectangular main block and rear kitchen wing, were constructed in Garrett County from the late nineteenth through the early twentieth centuries.
